WORK EXPERIENCE

Prudent Insurance Brokers Ltd, Gurgaon | *Software Engineer 2*

October 2025 – Present

- Lead **AAA WCAG** compliance for Compass platform
- Developed and own **AI** based priority issue triage system for Compass platform. Reduced manual triage time by **60%**
- Lead UI development of AI adviser for Compass platform, increasing user adoption by **20%**

SHL India, Gurgaon

Software Engineer

March 2024 – September 2025

- Led the development of **SHL's AI Screener (SIA)**, currently the product sits at **8000+ MAU**.
- Integrated **TC+** platform into **SHL Japan** following its acquisition, serving **100,000 MAU** across enterprise clients.
- Achieved **AAA WCAG compliance** across **11** SHL products, significantly improving usability for diverse user groups.
- Led the initiative to remove vulnerabilities from **12** legacy products, enabling successful client-side security scans.
- Built **6 TC+ assessments** and cut **CI/CD** build times by **40%**, saving **5 minutes** per check-in.
- Deployed a self-hosted **LibreSpeed** instance on internal servers, eliminating third-party API costs and reducing **mid-assessment drop-off rates by 30%** through precise candidate-to-server latency gating.

Associate Software Engineer

January 2022 – March 2024

- Developed proctoring services for **TC+** assessments platform, increasing user adoption to **300+** enterprise clients
- Led development of **Process Monitoring**, currently used across 3 industry sectors and seeing over **10000 MAU**
- Migrated **8** applications from AngularJS to Angular and React, decreasing initial load time by **80%**, build size by **30%**
- Created **ATOM**, a reusable form management library adopted across **5** teams, reducing form development time.

SKILLS

Languages: JavaScript, Typescript, SQL, CQL

Frameworks and Libraries: Angular, ReactJS, Single-SPA, Docker, NodeJS, Cloudflare, ExpressJS, NestJS, NextJS

Tools and Utilities: HTML/CSS, SCSS, Reactive forms, Linux, RxJS, Canvas API, WCAG, Git, Bitbucket, Hooks API, Mobile First Design, Github, Github Actions, Responsive UI, Jira, Functional Programming

AI: Antigravity IDE, Antigravity CLI, Github Copilot, Claude Skills, MCPs, Agentic Workflows, AI Agents & Sub-Agents, AI Harness Development, Token/Context Optimization

PROJECTS

Byte-me | *Ubuntu, Docker, Cloudflare, Nextcloud, SSH, Self-Hosting*

[🔗 View Project](#)

Architected and self-hosted a secure home server setup running **Nextcloud** storage, a media streaming platform, and an **SSH** remote access server on **Ubuntu**. Implemented automated daily system health reporting, zero-trust internet exposure via **Cloudflare Tunnels**, and **Docker** container orchestration.

RagaReactive | *Typescript, RxJS*

[🔗 View Project](#)

Developed **RagaReactive**, a lightweight, **RxJS**-based state management utility for reactive applications. Simplifies state handling and subscriptions with a **TypeScript**-first API. Publicly available on **NPM**. This has been adopted by **SHL** and used in **3** projects for framework agnostic **state management**.

AWARDS

Experienced Practitioner – SHL India

October 2022

Recognized for my work in developing Next Generation assessments (Avatar based assessment and Process Monitoring)

EDUCATION

Amity School of Engineering and Technology, Noida, Uttar Pradesh

July 2018 – April 2022

B.Tech in Computer Science

GPA: 7.31
