Work Experience

Software Engineer at SHL India, Gurgaon

March 2024 – Present

- Contributed to the development of SHL's AI Screener (SIA), currently in limited release and used by ~500 candidates monthly.
- Assumed increased leadership responsibilities as a Software Engineer, mentoring 4 developers and driving improvements across multiple projects.
- Achieved AAA WCAG compliance across 11 SHL products by implementing accessibility patterns, significantly improving usability for diverse user groups.
- Led the initiative to remove vulnerabilities from 12 legacy products, enabling successful client-side security scans that had previously failed.
- Developed 6 new assessments for the TC+ platform and streamlined the CI/CD pipeline to enhance build reliability and reduce deployment friction.

Associate Software Engineer at SHL India, Gurgaon

January 2022 – March 2024

- Played a pivotal role in launching TC Plus, a new assessments platform adopted by 300+ enterprise clients.
- Designed and developed media-rich assessments to improve candidate engagement and assessment quality.
- Led development of Process Monitoring, a simulation-based assessment now used across three industry sectors.
- Directed migration of 8 applications from AngularJS to Angular and React, improving performance and maintainability.
- Enhanced accessibility across platforms in alignment with WCAG guidelines.
- Created ATOM, a reusable form management library adopted across 5 teams, reducing form development time significantly.

Web Development Intern at Marksman Technologies, Noida

May 2021 – July 2021

- Built responsive landing pages and dashboards using HTML, CSS, JavaScript, and Bootstrap, improving page load speed by 30%.
- Integrated REST APIs and assisted in debugging user-facing issues across 3 projects.

Web Development Intern at Nethuts, Kolkata

September 2020 – December 2020

- Designed and developed 4 front-end components for client projects using HTML, CSS, and jQuery.
- Assisted in testing and deploying WordPress-based sites, accelerating project delivery by 20%.

Skills

Programming Languages: JavaScript, Typescript

Frameworks: Angular, ReactJS, Unity, Single-SPA, CapacitorJS

Others: HTML/CSS, SCSS, Reactive forms, RxJS, Canvas API, WCAG, Git, Bitbucket

Hooks API, Mobile First Design, Responsive UI, Jira, Functional Programming

Projects

TC+

Angular ReactJS HTML SCSS Javascript Reactive forms Canvas API Hooks API Context API Responsive UI Mobile First Design

🔗 [View Project](#)

Contributed to the launch of TC Plus, SHL's flagship assessments platform. Built and optimized 100+ assessments using Angular and ReactJS. Improved frontend stability, reduced load times, and integrated proctoring services. The platform now serves over 300 enterprise clients and generates significant revenue.

Avatar-based Assessment

Angular HTML Javascript SCSS Reactive forms

Independently developed the frontend for a media-rich, avatar-based assessment simulating real-life interviews. Created under the guidance of the Director of AI and Project Manager, currently in user trials with excellent engagement and usability feedback.

Process Monitoring

Angular HTML SCSS Javascript Canvas API

🔗 [View Project](#)

Co-developed a gamified assessment simulating a process monitoring station. Built using Angular and Canvas API, the tool was optimized for low-end devices to maintain 45+ FPS. Now delivering over 5,000 assessments monthly and contributing to significant revenue growth.

SIA – AI Screener

ReactJS Typescript Canvas API Angular Context API Hooks API

Contributed to SHL's AI Screener with a focus on chat-based AI for automated candidate interviews. The system combines generative video and NLP-driven chat AI, currently used by 500+ candidates monthly during limited release.

TC+ Microfrontend Transition

ReactJS Typescript Angular Single-SPA RxJS Hooks API

Leading the architectural transformation of TC+ into a microfrontend structure using ReactJS, Angular, and Single-SPA. This shift has improved scalability, accelerated deployment cycles, and simplified assessment onboarding for multiple teams.

TC+ Accessibility Initiative

WCAG Angular ReactJS Reactive forms Javascript Canvas API SCSS Hooks API

Achieved AAA-level WCAG compliance across the TC+ platform by implementing keyboard navigation, screen reader support, and focus management features. Enhanced accessibility led to increased client adoption, especially across the EU where compliance is mandatory.

Migration Initiatives

ReactJS Angular Angular JS Reactive forms Javascript SCSS Hooks API Context API

Led the migration of legacy AngularJS code to Angular and React. Improved performance, maintainability, and reduced security vulnerabilities. Currently mentoring 5 junior developers through the migration of individual assessments.

Atom

React Zustand Typescript

Core contributor to Atom, a React library offering input handling and form management using hooks. The library is now adopted by 12 squads across 4 teams, reducing form implementation time and standardizing user experience.

RagaReactive

Typescript RxJS

[View Project](#)

Developed RagaReactive, a lightweight, RxJS-based state management utility for reactive applications. Simplifies state handling and subscriptions with a TypeScript-first API. Publicly available on NPM.

Awards

Experienced Practitioner

October 2022

Awarded by: SHL India

Recognised for my work in developing Next Generation assessments (Avatar based assesment and Process Monitoring)

Education

Amity School of Engineering and Technology

July 2018 – April 2022

B.Tech in Computer Science

Location: Noida, Uttar Pradesh

GPA: 7.31
